

TxtTV

TxtTV is an advanced, feature rich mobile application which is used to read teletext. Its interface is clean, elegant and simple. One doesn't need to learn the usage of application as anyone can directly start using it.

It has many features:

- Page-Alerter

a Hockey match is ongoing and you need watch it live? No problem, Page – Alerter will alert if changes are made in page's content

- BookMarks

Keep a collection of your favourite teletext - pages and you can refer to them at a later point. TxTTV also keeps their contents synchronized.

- Database for pages

The pages are cached in a database. It means that unnecessary bandwidth usage is avoided.
