TRUST' NGO

YOU can change YOUR World

Introduction

Nowadays, there are a lot of organizations offering humanitarian help in different countries around the world. However, there are so many people who continue refusing to collaborate with this organizations, unsure about where their money goes and if actually it helps the population.

People have the right to know where their money goes, what each organization does with the donation that they receive and how much. People would like to have the information clear and transparent about the management that makes this kind of organizations.

We propose a website that allows focusing all the information about the organizations.

Functionalities

NGOs will be able to register in the system, including various information (e.g.foundation date or number of members). Depending on admin's approval, all information can be updated.

Information about humanitarian aid will be submitted by NGOs and published after administrators approval.

The main page of the web application will be dominated by a map were information about disasters, humanitarian aid shipments and news are displayed.

Statistics concerning NGOs activities will be published.

Users will be able to access to NGOs bank accounts so they will be able to made donations for a specific disaster or NGO.

Any NGOs news will be published prior administrators moderation.

Administrators will have access to a complete set of tools in order to review all the information and approve it for publishing after verification.
