iImagine

- **Amazing Features!**

- Image categorization using **visual information**

- No need to manual labelling -> **easy!**

- Use advanced **virtual folders** to find visually similar images! FUN!

- Image synchronization between the server and client(s)

- Have access to your images from your smart phone and computer!

- Images are always in **safe** and **up-to-date!**

Image categorization

Qt Coding Experiences

- Cute seems to fit very nicely in the smart phones
- Lectures, code camp spirit
- Very limited possibility to test software on a real phone, networking
- In the beginning it was very difficult to choose a feasible approach to solve problems
- Networking caused surprisingly lot problems
